SUBJECT: Genetically Modified Organisms Declaration

Products covered in this declaration:

Maurivin active dried wine yeast
Mauribrew active dried beer yeast
Mauriake active dried sake yeast
Mauriferm fermentation aids

Dear Sir/ Madam,

This letter is in response to customer requests for information regarding Genetically Modified Organisms.

The current legislation requires that “foods produced using gene technology must be labelled where they are substantially different in any characteristic or property of the food compared to their conventional counterpart”.

Mauri Yeast Australia products are produced from selected strains of the *Saccharomyces sensu stricto* group supplied by AB Mauri Scientific Services at AB Mauri’s Global Technology Group. None of the strains have been genetically modified; that is, no strains have been subjected to, or modified by, in vitro recombinant DNA technology.

To the best of our knowledge none of the above Mauri Yeast Australia products contain any ingredients produced using gene technology. This information is based on genetic modification statements provided by Mauri Yeast Australia suppliers.

I trust that this information is sufficient for your purposes. If you require further information, please do not hesitate to contact the undersigned on +61 (0)2 9684 8605.

Yours sincerely,

David Norris
ANZ Quality and Technical Manager
